

- 1. Reduction of food waste
- 2. Reduced single-use packaging costs
- 3. Reduced disposal costs
- 4. Lower return costs
- 5. Less truck frequency
- 6. Lower admin costs
- 7. Lower rental costs
- 8. Less capital commitment
- 9. Lower warehouse costs
- 10. Taxonomy compliance
- 11. Avoidance of tare differences

Ecological advantages

- CO₂ savings from Volume reducibility
- 2. C20
- 3. Reduction of single-use packaging waste
- 4. Fulfillment of environmental targets
- 5. No PFAS
- 6. Less water consumption
- 7. Certified sustainability guaranteed

- 1. Taxonomy
- 2. PPWR conform
- 3. ESG conform
- 4. CSRD conform

- More security in planning
- 2. Tracking-capable RTPs
- 3. Automation in the
- 4. Transnational solutions
- 5. Fewer returns & credit notes
- 6. Higher handling speed
- 7. Automated cleaning & recycling
- 8. Reduced coordination effort
- 9. Less manual rework
